Line 1: In the beginning, technology was simple and slow.

Line 2: Over time, innovation fueled the rise of faster machines.

Line 3: The world soon became connected by invisible threads of data.

Line 4: From humble beginnings, artificial intelligence emerged.

Line 5: Now, every second counts in a digital world.

Line 6: Real-time systems deliver updates the moment they happen.

Line 7: Server-Sent Events push data to clients as soon as it's available.

Line 8: Developers rely on reactive frameworks to manage these streams.

Line 9: The future is event-driven, efficient, and always on.

Line 10: And it all starts with a single event.
